David Cifuentes

Scarborough, ON | (647) 562-6958 | jdcifuentes@gmail.com | linkedin.com/in/davidcifuentes80

Valid Ontario G Full Driver's Licence | Bilingual: English (Professional) & Spanish (Native)

PROFESSIONAL SUMMARY

Controls & Automation Engineer with 10+ years of experience in industrial automation, PLC programming, SCADA/HMI systems, VFDs, and control system integration within manufacturing environments. Proven track record managing multi-site engineering projects across 3 facilities with CAPEX budgets exceeding $950K. Experienced in Rockwell (Allen-Bradley), Siemens, Schneider, and B&R platforms with hands-on experience in system commissioning, troubleshooting, and modernization of legacy control systems. JHSC Certified (Part 1 & 2) with strong knowledge of CSA, ESA, and CEC electrical standards.

CORE COMPETENCIES

PLC Programming: Rockwell "Allen-Bradley" (ControlLogix, CompactLogix, RSLogix 5000/Studio 5000), Siemens (TIA Portal, Step 7, WinCC), B&R Automation Studio, Schneider SoMachine, Click PLC

HMI / SCADA: FactoryTalk View SE/ME, WinCC, Weintek EasyBuilder

Industrial Networks & Protocols: Ethernet/IP, Modbus TCP/RTU, Profibus, DeviceNet, TCP/IP, Serial Communication

Safety Systems: Safety Interlocks, Safety PLCs, Machine Guarding, Emergency Stop Circuits, Risk Assessments

Drives & Motion Control: VFDs, Servo Drives, Motor Starters, Soft Starters

Instrumentation: Temperature, Pressure, Level, and Flow Sensors; Analog/Digital I/O Configuration

Data & Scripting: Python (Data Analysis, System Integration), SQL, Data Visualization

Electrical Standards: CSA C22.1 (CEC), ESA Regulations, OHSA, JHSC Certified (Part 1 & 2)

CAD & Design: SolidWorks, AutoCAD, Autodesk Inventor, Solid Edge

Engineering Documentation: P&IDs, Electrical Schematics, I/O Lists, Control Narratives

PROFESSIONAL EXPERIENCE

ALLEGUARD (FORMERLY AMVIC SYSTEMS) | Toronto, Scarborough & Calgary, ON/AB

Continuous Improvement Manager 2023 – Present

- Led commissioning and startup of automation systems, including PLC validation, I/O checks, and system integration. $950K+ annual CAPEX portfolio encompassing 9+ concurrent engineering and automation projects across 3 manufacturing facilities (Toronto, Calgary, Passmore), delivering estimated 3x cost savings versus external contractors.
- Interpreted P&IDs, electrical schematics, and I/O lists to support system integration, troubleshooting, and commissioning of automation systems.
- Performed field troubleshooting and on-site support for automation systems, including PLCs, HMIs, and drives.
- Lead automation upgrades for EPS block moulding machines (Hirsch 1100/1300/1400), improving process stability and reducing unplanned downtime through control logic optimization and sensor integration.
- Modernized legacy control systems by implementing new PLC and HMI platforms (Allen-Bradley, Weintek), improving system diagnostics and real-time operational visibility.
- Develop automation safety interlocks and control logic to improve machine reliability and ensure compliance with CSA, ESA, and CEC standards.
- Lead the cooling tower automation project ($65K) in Calgary, designing temperature control systems that improved cooling efficiency and reduced energy consumption.
- Commission and oversee packing machine relocation and automation project ($140K) for the Calgary facility, coordinating mechanical, electrical, and PLC programming scopes.
- Designed mechanical solutions and tooling for EPS production, improving process efficiency and material handling.
- conducting workplace inspections and driving safety compliance.

AMVIC SYSTEMS | Toronto & Scarborough, ON

Process Improvement Manager 2021 – 2023

- Managed engineering improvement projects focused on production efficiency, equipment modernization, and automation upgrades across 2 manufacturing plants.
- Led implementation of new PLC-controlled automation systems and machine modifications, increasing throughput and reducing manual intervention.
- Programmed and configured Allen-Bradley and Siemens PLCs for process control applications, including batching, sequencing, and alarm management.
- Designed HMI screens using FactoryTalk View and Weintek EasyBuilder for operator interfaces, providing real-time process data and diagnostics.
- Implemented Lean and Continuous Improvement methodologies (Kaizen, 5S, GEMBA, Poka-Yoke) to optimize production processes.

AMVIC SYSTEMS | Toronto, ON

Maintenance Assistant 2020 – 2021

- Implemented preventive, predictive, and corrective maintenance programs for manufacturing equipment including EPS moulding machines, boilers, and material handling systems.
- Troubleshot and resolved PLC, HMI, VFD, and sensor issues to minimize production downtime across multiple production lines.
- Configured industrial communication networks (Ethernet/IP, Modbus) for equipment integration and data acquisition.

INSTRUCONT SAS | Colombia

Specialist Engineer and Developer 2017 – 2019

- Designed and implemented industrial automation systems including PLC programming (Allen-Bradley, Siemens), HMI interface development, and process instrumentation.
- Led system commissioning, I/O verification, wiring validation, and startup of distributed control systems.
- Developed SCADA solutions for remote monitoring and control using Modbus and Ethernet/IP protocols.

DSHAYTECH SAS | Colombia

Project Manager & Founder 2014 – 2018

- Founded and managed an automation and engineering consulting firm delivering PLC programming, SCADA integration, and CNC automation solutions.
- Designed electronic and mechanical systems using SolidWorks, Inventor, and AutoCAD for industrial applications.

FILMTEX SAS | Colombia

Maintenance Coordinator 2013 – 2014

- Directed maintenance operations leading a team of 120 technical personnel across mechanical, electrical, and instrumentation disciplines.
- Developed preventive maintenance plans and implemented root cause analysis (RCA) programs to reduce unplanned equipment failures.
- Implement new projects using PLCs Schneider with SoMachine Software, and Siemens with Step 7

EDUCATION

Bachelor of Mechatronic Engineering

University of San Buenaventura | Bogotá, Colombia | 2013

Diploma in Industrial Automation Technologies and PLC Applications

University of San Buenaventura | Bogotá, Colombia | 2013

CERTIFICATIONS & TRAINING

- JHSC Certification Part 1 & Part 2 (Worksite Safety) | 2025
- Management Co-Chair, Joint Health and Safety Committee (JHSC)
- CSA C22.1 Canadian Electrical Code – Applied Knowledge
- Continuous Improvement (Kaizen, 5S, GEMBA, Kanban, Poka-Yoke)
